Fe Mechanical Study Guide

To calculate the mechanical advantage of a compound machine, find the mechanical advantage of each of the simple machines of which it is composed and computing their product. For example, if a compound machine is made up of three simple machines, one with an MA of 5, one with an MA of 2, and the last one with an MA of 1, the MA of the compound machine is $(5 \cdot 2 \cdot 1 = 10)$.
