Erosion and Landforms Weathering and Erosion Outline
Chapter14 This red rock formation in Australia—like Earth's entire surface—is shaped by the processes of weathering and erosion. These processes are essential to the formation of soil, from which the food you eat grows.

14 Weathering and Erosion - SharpSchool

Weathering breaks down the Earth's surface into smaller pieces. Those pieces are moved in a process called erosion, and deposited somewhere else. Weathering can be caused by wind, water, ice, plants, gravity, and changes in temperature. To better understand how the erosion and weathering process works....
