...

This project requires that a ping pong launcher is to be built that can project a ping pong ball into a 0.25 m tall basket that is 2 metres, 4 metres, 6 metres and 8 metres away. The requirements also state that the launcher must be placed on the ground and cannot be held in the

Agilan's Ping Pong Ball Launcher - Presentation by A V

I am trying to make what will in the long run be an automatic ball launcher for a dog. I am fairly experienced with embedded systems so I'm not worried at all about the software side of the project. The method I'm going for is to have two spinning wheels that the ball gets launched from between.
